

Zimbra Collaboration Suite 4.0 - Open Source Edition

Zimbra is an *open source server and client* technology for *next-generation enterprise messaging and collaboration*. Zimbra delivers *innovation* for both the [administrator](#) and the [end user](#) as well as *compatibility* with existing infrastructure and applications (both open source and proprietary). Zimbra is open source in order to leverage the collective talent of the greater community, and to ensure investment protection for Zimbra partners and end-users.
